

1-Emoji Mood Selector

Description:

Let users select their current mood using buttons, and display a related emoji.

Requirements:

- 3-5 mood buttons: Happy, Sad, Angry, Excited, etc.
- When a button is clicked, show the selected mood and an emoji
- Example: You are feeling: 😊 Happy

2-Color Mixer

Description:

Let users choose two colors and see the mix result.

Requirements:

- Two `<input type="color">` fields
- Button: "Mix Colors"
- Show a `div` with a background gradient of the two colors

3-Product Quantity Picker (Mini Cart)

Description:

Simulate choosing quantity of a product and showing total price.

Requirements:

- Display a product name and price (e.g. "Apple - \$2")
- Buttons to increase/decrease quantity
- Show total price = quantity × price
